Maximize the Performance of Your Glock 48? With an Upgraded "Top Half"

With a Brownells Front Cut Slide for the Glock® 48 installed, you'll find your Glock® becomes easier to operate without any change in its reliability. The G48's greatest strength is that it lets you carry a thin pistol with 10 rounds of centerfire punch in a compact EDC package. As a bonus this slide will also fit on your G43x and 43 with the correct G48 barrel, converting your ultra compact to a ultra thin long slide version. Our Front Cut Slide gives you more grasping surface on your Glock® 48 by adding deep-cut serrations at the front of the slide. This is a big help when making a quick press check of the chamber. Both the front and rear serrations have crisp 90-degree edges that give you excellent purchase, and they're cut to the same depth as the factory grooves - so there's no compromise of the slide's overall strength. We also offer the Front Cut Slide for Glock® 48 in a "window" configuration with a window cut in the top of the slide ahead of the ejection port. This aids in barrel cooling, slightly reduces the weight of the slide for faster cycling, and...well, it just looks cool, too. Machined from heat-treated & hardened 17-4 stainless steel billet. Hard, wear-resistant matte black Nitride finish. Internal dimensions identical to factory slide. Factory rear sight dovetail & front sight tenon cut. Slide only - no internal parts (see Gun Tech Note below). The Front Cut Slide for Glock® 48 comes with a factory rear sight dovetail and slot for the front sight tenon. It will accept both factory "iron" (actually, plastic) sights and any aftermarket sights that fit the factory cuts. Upgrade the slide on your pocket Glock today for immediate improvement in its functionality and performance - and your shooting enjoyment. Brownells Gun Tech™ Note: The Front Cut Slide for Glock® 48 consists of the bare slide only. You will need to retain your pistol's existing barrel (or an aftermarket upgrade) and recoil guide / spring assembly, firing pin assembly, extractor, extractor depressor plunger & spring assembly, firing pin safety & spring, and your back plate. The G48 slide does not require a firing pin channel liner.

Safety Instruction Guide for IRON SIGHT SLIDES FOR GLOCK® 48

Introduction

Thank you for choosing the Brownells Iron Sight Slide for Glock® 48. This guide provides essential safety instructions and guidelines to ensure the safe use and installation of your new product, in compliance with the EU General Product Safety Regulation (GPSR). Please read this document carefully before use.

General Safety Guidelines

- Ensure that the product is used only as intended. The Iron Sight Slide is designed specifically for the Glock® 48 and is compatible with Glock® 43x and 43 when using the correct G48 barrel.
- Always handle firearms with care, following all local laws and regulations regarding firearm use and ownership.
- Keep the product out of reach of children and unauthorized users.
- Regularly inspect the Iron Sight Slide for any signs of wear or damage. If any issues are found, discontinue use immediately and consult a qualified gunsmith.
- Use only factory or compatible aftermarket components that meet safety standards when upgrading your firearm.

Specific Safety Precautions for Use

- Always ensure the firearm is unloaded before installing or removing the slide.
- Wear safety glasses when handling or modifying firearms to protect your eyes from debris.
- Avoid touching the barrel or slide immediately after firing, as they may be hot and can cause burns.
- Ensure that the firearm is pointed in a safe direction during any installation or handling procedures.
- Do not modify the slide or any other components beyond the manufacturer's specifications, as this may compromise safety and reliability.

Instructions for Installation and Usage

1. Preparation:

- Ensure the firearm is unloaded and pointed in a safe direction.
- Gather necessary tools, including a punch tool and a torque wrench if required.

2. Installation:

- Remove the existing slide from your Glock® 48 by pushing out the slide lock and pulling the slide forward off the frame.
- Retain the factory barrel, recoil guide/spring assembly, firing pin assembly, extractor, extractor depressor plunger & spring assembly, firing pin safety & spring, and back plate.
- Carefully install the Brownells Iron Sight Slide onto the frame, aligning it with the frame rails.
- Reinstall the factory or compatible components as needed. Ensure all parts are securely in place.

3. Final Checks:

- Perform a press check to ensure the chamber is clear and the slide is functioning correctly.
- Test the slide's movement to ensure it operates smoothly without any obstructions.

4. Usage:

- When using the firearm with the new slide, conduct regular checks to ensure all components are functioning properly.
- Familiarize yourself with the new slide features, including the deepcut serrations for improved grip.

Disposal Instructions

- Dispose of any packaging materials and old components in accordance with local regulations.
- If the Iron Sight Slide or any parts become damaged beyond repair, consult a local waste management facility for proper disposal methods.

Contact Information for Further Support

For any questions or concerns regarding the Iron Sight Slide for Glock® 48, please refer to the manufacturer's website or contact their customer service for assistance.

Conclusion

By following these safety guidelines and instructions, you can ensure the safe and effective use of the Brownells Iron Sight Slide for Glock® 48. Thank you for prioritizing safety and compliance in your firearm practices.
