

DOT MODULES - 4 MOA Dot Module for Polymer Sights

[Optics & Mounting](#) > [Electronic Sights](#) > [Red Dot Sights](#)

C-MORE Systems red dot sights encapsulate the light source in a separate diode module. These modules are interchangeable in all C-MORE full size sights (NOT STS or RTS2), providing each sight with the ability to utilize different size dots for different applications. The size of the dot is measured in minutes of angle (moa), with 1 minute of angle being equal to 1 inch @ 100 yards (approx.). Example; a 2 moa module will produce a dot that will cover 2 inches of your target @ 100 yards, a 6 moa module will cover 6 inches, and so on. When you reduce the target distance by half, you also reduce the minute of angle by half. Example; the 2 moa module will cover 1 inch @ 50 yards, the 6 moa module will cover 3 inches @ 50 yards, and so on. C-MORE Systems red dot sights are known for having the brightest dots available, that won't "wash out" on bright, sunny days. The modules are continuously upgraded as new technology becomes available thanks to Advanced Diode Technology. C-MORE diodes produce super-efficient current consumption which extends battery life to 300 - 1500 hours of continuous use from a single 3 volt lithium battery.

Attributes

- Name: [4 MOA Dot Module for Polymer Sights](#)
- Manufacturer: [C-MORE SYSTEMS](#)
- Product no.: 100200344
- Mfr. No.: 4MOA
- Battery Life: 300-1500 hours
- Finish: Black
- Reticle: 4 MOA red dot
- Delivery weight: 0.091kg
- Shipping height: 25mm
- Shipping width: 25mm
- Shipping length: 25mm
- UPC: 649725005008

Item details

Made in USA

US export classification: 0A504.c.

Safety Instruction Guide for DOT MODULES 4 MOA Dot Module for Polymer Sights

Introduction

Thank you for choosing the DOT MODULES 4 MOA Dot Module for Polymer Sights by CMORE Systems. This guide provides essential safety instructions to ensure the safe and effective use of your product. Please read this guide carefully before installation and use.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose as described in the product specifications.
- Always handle the dot module with care to avoid damage.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the dot module for signs of wear or damage before use.
- If you notice any irregularities, do not use the product and contact the manufacturer for support.
- Be aware of your surroundings while using the sight to prevent accidents.

Specific Safety Precautions for Use

- Do not expose the dot module to extreme temperatures or moisture.
- Avoid looking directly into the light source when the dot module is powered on to prevent eye damage.
- Ensure that the module is securely attached to the sight before use to prevent it from falling off during operation.
- Use only the recommended 3 volt lithium battery to avoid potential hazards.
- Do not attempt to disassemble or modify the dot module, as this may result in malfunction or injury.
- Follow all local laws and regulations regarding the use of sighting devices.

Instructions for Installation and Usage

1. Installation:

- Ensure the firearm is unloaded and pointed in a safe direction.
- Remove the existing module from the sight if applicable.
- Align the DOT MODULE 4 MOA with the mounting slot on the sight.
- Gently press down until the module clicks into place.
- Confirm that the module is securely attached before proceeding.

2. Usage:

- Power on the dot module by pressing the designated button.
- Adjust the brightness of the dot as needed for your environment.
- Aim the sight at your target and ensure the dot is clearly visible.
- When finished, power off the dot module to conserve battery life.
- Store the sight in a safe and dry location when not in use.

Disposal Instructions

- Dispose of the dot module and its components in accordance with local regulations.
- Do not dispose of batteries in regular household waste. Follow your local guidelines for battery disposal or recycling.
- If the product is damaged or no longer usable, contact your local waste management authority for proper disposal methods.

Contact Information for Further Support

For any inquiries regarding safety or product support, please reach out to the manufacturer directly. Ensure you have your product details ready for a more efficient response.

By following these safety guidelines and instructions, you can ensure a safe and enjoyable experience with your DOT MODULES 4 MOA Dot Module for Polymer Sights. Thank you for your attention to safety!
