

# **BACKUP IRON SIGHT W/TRITIUM FOR GLOCK G43X/G48 - FORWARD CONTROLS DESIGN GLOCK G43X/G48 BACKUP IRON SIGHT WITH TRITIUM**

[Handgun Parts](#) > [Sights](#) > [Sight Sets](#)

BIS, G43X/48 (Backup Iron Sight, G43X/G48) is a collaboration between Ameriglo and FCD. Specifically made for Glock G43X and G48, these sights are based on the superb Ameriglo GL-527 with a front sight height of 0.450", and a rear sight height of 0.554", this sight sets provide lower 1/3 co-witness with the Trijicon RMRcc when used with the OPF-G43X/43, RMRcc on G43X and G48. BIS, G43X/48 consists of the following: Front sight, available with either green Tritium and white outline (no serrations), or serrated front sight, no tritium or white outline. Rear sight, serrated. BIS, G43X/48 is slightly different from GL-527 on which it's based. These FCD particular changes are: Tritium option for the front sight. Front sight back strap angle is steeper (25 degrees on the serrated, non-tritium front sight, 20 degrees on non-serrated, tritium front sight) to mitigate snagging when the pistol is drawn from and out of the holster where it's likely to encounter clothing, and the front sight's top corners are softened. Rear sight is horizontally serrated. Designed and made in the USA. Special thanks to the professionals at Ameriglo <https://ameriglo.com/> that made this project possible, Forward Controls Design are grateful for their willingness to work with a small outfit for their shared customers / users.

G43X/49 with RMRcc is approved by many agencies, most of which require red dot pistols be equipped with metallic, co-witnessing backup sights for both on and off duty use. BIS, G43X/48 was created with them in mind. NOTE: If you don't have a sight pusher or the equipment to install rear sights, please bring it to a qualified and competent gunsmith to perform the installation. It's not uncommon to have to fit the rear sight to the dovetail, a competent gunsmith should be well familiar with the reason and method. Forward Controls Design have seen more than enough expensive muzzle devices ruined by "gunsmiths" that used a screw driver to install them instead of a torque wrench, and hand tightened optics plate screws when a torque value is clearly noted in multiple places. Rather than being loose (easy to install), Forward Controls Design prefer the sights be tight, so it won't be knocked off zero easily. Tolerances of the dovetail and sights also come into play, which results in some being easier, while others are harder to install. A qualified gunsmith can deal with these easily.

## **Attributes**

- Name: [FORWARD CONTROLS DESIGN GLOCK G43X/G48 BACKUP IRON SIGHT WITH TRITIUM](#)
- Manufacturer: [FORWARD CONTROLS DESIGN](#)

# Safety Instruction Guide for BACKUP IRON SIGHT W/TRITIUM FOR GLOCK G43X/G48

## Introduction

Thank you for choosing the BACKUP IRON SIGHT W/TRITIUM FOR GLOCK G43X/G48 from Forward Controls Design. This product is designed to enhance your shooting experience and improve accuracy. However, it is important to follow safety instructions to ensure proper use and avoid potential hazards.

## General Safety Guidelines

- Always treat your firearm as if it is loaded.
- Ensure that you are familiar with your firearm's operation and safety features before using the sight.
- Store your firearm and accessories in a secure location, out of reach of children and unauthorized users.
- Regularly inspect your firearm and sights for wear or damage.
- Use only compatible firearms with the BACKUP IRON SIGHT W/TRITIUM.
- Follow all local laws and regulations regarding firearm use and accessories.

## Specific Safety Precautions for Use

- Ensure that the sight is securely mounted before use.
- Avoid using the firearm in conditions where visibility is compromised.
- Do not attempt to modify the sight or its components.
- If the sight becomes damaged or malfunctions, discontinue use immediately and consult a qualified gunsmith.
- Be aware of your surroundings and ensure a safe shooting environment.

## Instructions for Installation and Usage

### Installation

1. **Preparation:** Gather necessary tools, including a sight pusher or appropriate installation equipment. If you lack these tools, seek assistance from a qualified gunsmith.
2. **Remove Existing Sights:** Carefully remove any existing sights from your Glock G43X or G48 using the appropriate tools.
3. **Install Front Sight:**
  - Choose the desired front sight option (Tritium or serrated).
  - Align the front sight in the dovetail slot and press it into place using a sight pusher.
4. **Install Rear Sight:**
  - Select the serrated rear sight.
  - Align the rear sight in the dovetail slot and press it into place.
  - Ensure that the rear sight is fitted correctly, as some adjustments may be necessary.
5. **Check Alignment:** Once installed, check the alignment of both sights to ensure they are properly calibrated for shooting.
6. **Final Inspection:** Inspect the installation for tightness. The sights should not move when subjected to pressure.

### Usage

- When aiming, ensure that your line of sight is clear and unobstructed.
- Practice regularly to become familiar with the sight's adjustments and your firearm's handling.
- Always wear appropriate eye and ear protection when firing.

## Disposal Instructions

- Dispose of the product in accordance with local regulations regarding electronic waste and firearm accessories.
- If the sight is damaged beyond repair, consult local guidelines for safe disposal methods.

## Contact Information for Further Support

For any inquiries or support regarding the BACKUP IRON SIGHT W/TRITIUM FOR GLOCK G43X/G48, please refer to the official website or customer support channels provided by Forward Controls Design.

By following these guidelines and instructions, you can ensure a safe and enjoyable experience with your BACKUP IRON SIGHT W/TRITIUM FOR GLOCK G43X/G48. Always prioritize safety and responsible firearm usage.
