SUPPRESSOR CLEANING KIT SAFETY INSTRUCTIONS

Introduction

Thank you for choosing the Breakthrough Clean Technologies® Suppressor Cleaning Kit. This guide provides essential safety instructions and guidelines to ensure the safe and effective use of the product. Please read and follow these instructions carefully to maintain your safety and the performance of your suppressor.

General Safety Guidelines

- Ensure that the product is used only for its intended purpose as outlined in this manual.
- Keep the cleaning kit out of reach of children and vulnerable individuals.
- Always use the product in a wellventilated area to avoid inhaling fumes from the cleaner.
- Wear appropriate personal protective equipment (PPE), such as gloves and safety goggles, when using the suppressor cleaning kit.
- Avoid contact with skin and eyes. If contact occurs, rinse immediately with plenty of water and seek medical attention if irritation persists.
- Do not ingest any of the cleaning products. In case of ingestion, seek medical attention immediately.
- Store the cleaning kit in a cool, dry place away from direct sunlight and heat sources.
- Regularly check the kit for any damage or wear. Do not use damaged components.

Specific Safety Precautions for Use

- **Compatibility:** Ensure that the suppressor you are cleaning is compatible with the kit. The kit is designed for suppressors up to 2.375" in diameter and 8.5" in length.
- **Soaking Tube:** When using the soaking tube, ensure that the suppressor parts are fully submerged in the cleaning solution for optimal cleaning. Do not exceed the recommended soaking time.
- **Aftermarket Finishes:** Do not submerge suppressors with aftermarket finishes in the cleaning solution, as this may cause damage.
- **Cleaning Brushes:** Use the specialized brushes gently to avoid scratching or damaging the suppressor components.
- **Retrieval Tool:** Use the retrieval tool to safely extract cleaning patches and components from the soaking tube. Avoid using excessive force.

Instructions for Installation and Usage

1. Preparation:

- Gather all components of the cleaning kit: Suppressor Cleaner, Soaking Tube, Brushes, Retrieval Tool, and Organized Tool Tray.
- Ensure that your workspace is clean and wellventilated.

2. Cleaning Process:

- Remove the suppressor from your firearm according to the manufacturer's instructions.
- Place the suppressor parts into the soaking tube and fill it with the Breakthrough Clean Technologies® Suppressor Cleaner until the parts are fully submerged.
- Allow the components to soak for the recommended time (refer to the product label for specific instructions).
- After soaking, use the specialized brushes to scrub the suppressor parts, focusing on areas with noticeable fouling and carbon buildup.
- Utilize the retrieval tool to safely remove the parts from the soaking tube once cleaning is

complete.

- Rinse the cleaned parts with water to remove any remaining cleaner and ensure thorough drying before reassembly.

3. PostCleaning:

- Store all components in the organized tool tray to keep them in good condition and easily accessible for future use.
- Regularly maintain your suppressor by cleaning it after every few uses to ensure optimal performance.

Disposal Instructions

- Dispose of any unused or expired cleaning solution according to local regulations. Do not pour down drains or dispose of in regular trash.
- Recycle packaging materials where possible. Follow local recycling guidelines.
