SAFETY LEVER/SELECTOR FOR SIG SAUER P365 If you own a Sig P365, you probably know about the multiple issues with the factory safety selector. Put those behind you with Tyrant CNC's precision engineered P365 Safety Lever. Made from 17-4 heat-treated stainless steel and finished with a rugged PVD coating, this lever is built to withstand the rigors of consistent use while resisting corrosion and wear. Its extended arms are 2mm longer than the OEM design, featuring grooved serrations for a non-slip grip under adverse conditions. Tyrant's complete assembly kit is sold with a new stainless steel safety plunger and spring, ensuring a seamless installation process without the need for additional parts. Compatible with the Sig Sauer P365, P365X, P365XL, P365 Macro, and Tyrant CNC P365 grip modules in both 9mm and .380 Auto calibers, this safety lever enhances your firearm's ergonomics for unmatched shooting precision. Every P365 FCU from Sig Sauer has the option to add a safety selector, even if the safety selector version of the firearm was not purchased originally. The space for a safety selector remains in the FCU and can be added using this kit. Heat-Treated Stainless Steel for Maximum Durability Crafted from 17-4 heat-treated stainless steel and finished with a premium PVD coating, Tyrant's P365 manual thumb safety lever is built to resist wear and tear from constant use. Their heat treatment process strengthens the metal's wear resistance, so it performs efficiently when you need it most. Its PVD coating adds an extra layer of corrosion resistance for peak performance in all environments—from the humidity of concealed carry to the grit of the shooting range. Complete Kit with Plunger and Spring Included Tyrant's Sig P365 manual safety lever ships with a stainless steel safety plunger and spring, providing a complete assembly kit right out of the box. No need to mix and match parts or worry about compatibility issues. Each component is precision-engineered to work together, enhancing your firearm's performance from the moment it's installed. Extended Arms for Enhanced Control and Safety Tyrant's safety selector arms extend 2mm past the OEM design, adding a more responsive engagement. This slight extension makes a huge difference in high-stress situations where every millisecond counts. The grooved serrations provide a non-slip surface, ensuring positive engagement even with gloved hands or in wet conditions. Compatible with 9mm & .380 Auto Calibers As an experienced shooter, versatility is key. This safety lever is compatible with a range of P365 models including the P365, P365X, P365XL, P365 Macro, and even Tyrant CNC P365 grip modules. Whether you're running 9mm or .380 Auto, this lever integrates flawlessly with your firearm, maintaining the reliability you expect from your Sig Sauer. It's a drop-in upgrade, ensuring a perfect fit without gunsmithing.

Safety Instruction Guide for Tyrant CNC Safety Lever/Selector for Sig Sauer P365

Introduction

Thank you for choosing the Tyrant CNC Safety Lever/Selector for your Sig Sauer P365. This product is designed to enhance the safety and usability of your firearm. To ensure safe usage and compliance with the EU General Product Safety Regulation (GPSR), please read this safety instruction guide carefully before installation and use.

General Safety Guidelines

- **Product Safety:** This safety lever has been engineered to meet safety standards for nonfood products. It is important to ensure safe use, particularly when handling firearms.
- **Enhanced Recalls:** In the event of any safety issues, recall notices will be issued. Please stay informed about any recalls related to this product.
- **Online Shopping Protections:** If purchased online, you have the same safety protections as if you bought the product in a physical store.
- **Special Consumer Focus:** This product is not intended for children. Keep it out of reach of minors.
- **EU Contact Point:** For any safety inquiries, please refer to the contact information provided by the vendor at the time of purchase.
- **Rapid Alerts:** Stay updated on any unsafe products through the EU's Safety Gate platform.

Specific Safety Precautions for Use

- **Compatibility:** Ensure that this safety lever is compatible with your specific Sig Sauer P365 model (including P365, P365X, P365XL, P365 Macro, and Tyrant CNC P365 grip modules).
- **Installation:** Follow the installation instructions carefully to avoid potential hazards.
- **Inspection:** Regularly inspect the safety lever for any signs of wear or damage. Do not use the firearm if any components appear compromised.
- **Handling:** Always treat your firearm as if it is loaded. Keep the safety engaged when not in use.
- **Environment:** Avoid using the firearm in wet or slippery conditions unless necessary. Ensure a firm grip on the safety lever.
- **Training:** Ensure that all users are trained in the safe handling and operation of firearms.

Instructions for Installation and Usage

Installation Instructions

1. **Gather Tools:** Ensure you have the necessary tools for installation, including a small screwdriver.
2. **Remove Existing Safety Selector:** Follow the manufacturer's instructions to safely remove the existing safety selector from your Sig Sauer P365.
3. **Install the Tyrant CNC Safety Lever:**
 - Align the new safety lever with the designated space in the firearm's frame.
 - Insert the safety plunger and spring as per the included instructions.
 - Securely fasten the safety lever in place.
4. **Test Functionality:** Before using the firearm, test the safety lever to ensure it engages and disengages properly.

Usage Instructions

- **Engaging the Safety:** To engage the safety, push the lever to the "Safe" position. Ensure it clicks into place.
- **Disengaging the Safety:** To disengage, push the lever to the "Fire" position. Confirm it is fully in the "Fire" position before using the firearm.

- **Regular Checks:** Periodically check that the safety lever functions correctly, especially after extended use or exposure to harsh conditions.

Disposal Instructions

- **Environmental Considerations:** Dispose of any packaging and old parts in accordance with local regulations.
- **Recycling:** If applicable, recycle the product components in designated recycling facilities to minimize environmental impact.

Contact Information for Further Support

For further support or inquiries regarding the Tyrant CNC Safety Lever/Selector, please refer to the contact information provided by the vendor at the time of purchase.

Thank you for your attention to these safety guidelines. Your safety and the safety of others depend on the responsible use of this product.
