SAFETY LEVER/SELECTOR FOR SIG SAUER P365 If you own a Sig P365, you probably know about the multiple issues with the factory safety selector. Put those behind you with Tyrant CNC's precision engineered P365 Safety Lever. Made from 17-4 heat-treated stainless steel and finished with a rugged PVD coating, this lever is built to withstand the rigors of consistent use while resisting corrosion and wear. Its extended arms are 2mm longer than the OEM design, featuring grooved serrations for a non-slip grip under adverse conditions. Tyrant's complete assembly kit is sold with a new stainless steel safety plunger and spring, ensuring a seamless installation process without the need for additional parts. Compatible with the Sig Sauer P365, P365X, P365XL, P365 Macro, and Tyrant CNC P365 grip modules in both 9mm and .380 Auto calibers, this safety lever enhances your firearm's ergonomics for unmatched shooting precision. Every P365 FCU from Sig Sauer has the option to add a safety selector, even if the safety selector version of the firearm was not purchased originally. The space for a safety selector remains in the FCU and can be added using this kit. Heat-Treated Stainless Steel for Maximum Durability Crafted from 17-4 heat-treated stainless steel and finished with a premium PVD coating, Tyrant's P365 manual thumb safety lever is built to resist wear and tear from constant use. Their heat treatment process strengthens the metal's wear resistance, so it performs efficiently when you need it most. Its PVD coating adds an extra layer of corrosion resistance for peak performance in all environments—from the humidity of concealed carry to the grit of the shooting range. Complete Kit with Plunger and Spring Included Tyrant's Sig P365 manual safety lever ships with a stainless steel safety plunger and spring, providing a complete assembly kit right out of the box. No need to mix and match parts or worry about compatibility issues. Each component is precision-engineered to work together, enhancing your firearm's performance from the moment it's installed. Extended Arms for Enhanced Control and Safety Tyrant's safety selector arms extend 2mm past the OEM design, adding a more responsive engagement. This slight extension makes a huge difference in high-stress situations where every millisecond counts. The grooved serrations provide a non-slip surface, ensuring positive engagement even with gloved hands or in wet conditions. Compatible with 9mm & .380 Auto Calibers As an experienced shooter, versatility is key. This safety lever is compatible with a range of P365 models including the P365, P365X, P365XL, P365 Macro, and even Tyrant CNC P365 grip modules. Whether you're running 9mm or .380 Auto, this lever integrates flawlessly with your firearm, maintaining the reliability you expect from your Sig Sauer. It's a drop-in upgrade, ensuring a perfect fit without gunsmithing.

### Attributes

- Name: [TYRANT CNC SAFETY SELECTOR FOR SIG SAUER P365 - GOLD](#)
- Manufacturer: [TYRANT CNC](#)

# Safety Instruction Guide for Tyrant CNC Safety Lever/Selector for Sig Sauer P365

## Introduction

Thank you for choosing the Tyrant CNC Safety Lever/Selector for your Sig Sauer P365. This product is designed to enhance the performance and ergonomics of your firearm. To ensure safe and effective use, please read this guide carefully. It contains important safety information, installation instructions, and guidelines for proper use.

## General Safety Guidelines

- Ensure that the product is used only as intended and in accordance with the manufacturer's instructions.
- Always treat your firearm as if it is loaded, even when you believe it is not.
- Keep the firearm pointed in a safe direction at all times.
- Store the firearm and its components in a secure location, out of reach of children and unauthorized users.
- Regularly inspect your firearm and its components for any signs of wear or damage.
- Report any unsafe products or incidents to the appropriate authorities.

## Specific Safety Precautions for Use

- **Compatibility:** Ensure that the Tyrant CNC Safety Lever is compatible with your specific model of Sig Sauer P365, including P365, P365X, P365XL, and P365 Macro.
- **Installation:** Follow the installation instructions carefully to avoid improper fitting, which could lead to malfunction.
- **Testing:** After installation, test the safety lever to ensure it operates correctly before using the firearm.
- **Gloved Use:** If using the firearm with gloves, ensure that the lever provides a secure grip to prevent accidental disengagement.
- **Environmental Conditions:** Be cautious when using the firearm in wet or adverse conditions. The grooved serrations on the lever enhance grip, but always prioritize safety.

## Instructions for Installation and Usage

### Installation Instructions

1. **Gather Tools:** You will need basic tools such as a screwdriver for installation.
2. **Remove Existing Safety Selector:**
  - Ensure the firearm is unloaded.
  - Follow the manufacturer's guidelines to safely remove the existing safety selector.
3. **Install the Tyrant CNC Safety Lever:**
  - Align the safety lever with the designated slot on the firearm.
  - Insert the stainless steel safety plunger and spring as per the provided instructions.
  - Secure the lever in place according to the manufacturer's specifications.
4. **Test the Installation:**
  - Verify that the safety lever engages and disengages smoothly.
  - Check for any misalignment or obstructions.

### Usage Instructions

- Always engage the safety when the firearm is not in use.
- Familiarize yourself with the operation of the safety lever before using the firearm in a live environment.
- Practice using the safety lever in a controlled setting to ensure proficiency.

## **Disposal Instructions**

- Dispose of any packaging materials in accordance with local waste disposal regulations.
- If the safety lever becomes damaged beyond repair, dispose of it in a manner that prevents any potential hazards.

## **Contact Information for Further Support**

For any questions or concerns regarding the Tyrant CNC Safety Lever/Selector for Sig Sauer P365, please refer to the manufacturer's website for support and additional resources.

By following these guidelines and instructions, you can ensure the safe and effective use of your Tyrant CNC Safety Lever/Selector for Sig Sauer P365. Remember that safety is paramount when handling firearms. Thank you for your attention to these important safety measures.
