MAGPUL® EHG™ SG9™ GRIP FRAME FOR RUGER RXM™ SUB-COMPACT
Ruger and Magpul have over 100 years of combined experience designing and producing innovative, high-quality products in the firearms space. Magpul recently created a new grip - the EHG RG9 - for the new Ruger RXM, a 9mm NATO pistol made in the USA at Ruger's factory in Prescott, AZ. The RXM is designed for personalization and customization for your self-defense needs. Want a different look or size? The Ruger Fire Control Insert (FCI) is compatible with Magpul EHG RG9 Grips available in Black, Flat Dark Earth, Stealth Gray, and Olive Drab Green in the OEM 15-round Compact size as well as the new 12-round Sub-Compact and 17-round Full-Size. The EHG RG9 Grip packs many valuable features into its comfortable design. It includes a ¾-scale Magpul Trapezoidal Surface Projection (TSP) texture on the front strap, back strap, side panels, and forward index pads, providing improved tactile grip and weapons control where you need it most. To improve ergonomics, the grip also features an undercut trigger guard for comfortable handling of the gun. The magazine release scallop provides a recessed but easily accessed space for the magazine release, which has a textured, ridged surface to support more efficient magazine changes. The front of the grip features a universal rail for mounting lights and lasers to further enhance the pistol's utility. Of course, the EHG RG9 uses a strong, durable polymer like other Magpul products. The RXM Pistol ships from Ruger with the MAG1436 Compact EHG RG9 Grip plus two PMAG 15 GL9 15-round mags (the capacity-compliant version of the RXM ships with two 10-round GL9 PMAGs). This Sub-Compact Grip replaces the factory one for those who want an even more condensed profile. It is compatible with the MAG674 Magpul PMAG® 12 GL9® for the G26 as well as longer magazines with some protrusion from the bottom of the grip. The EHG RG9 Grip also comes assembled with a Ruger-manufactured magazine release, release spring, slide-lock spring, and takedown-pin spring, and functions with most aftermarket Gen3 parts, so if any of these pieces need to be replaced or upgraded, spare parts are readily available. Made in the USA.

FEATURES TSP TEXTURE Magpul's proprietary TSP texturing on the front and backstraps, side panels, and forward index pads of the RXM EHG provide solid purchase on the grip in all conditions **OPTIMIZED FOR CONCEALMENT** Shorter grip length for improved CCW ability Easily accessed magazine release The RXM EHG integrates perfectly with the PMAG 12 GL9 for the G26 GEN3 **COMPATIBILITY** The RXM EHG is compatible with most Gen3 aftermarket parts, such as slide-stop and mag release components **SPECS** Platform: Ruger® RXM™ Grip Angle: 20.5 deg. Compatibility: The Magpul EHG RG9 Grips only fit the Ruger RXM Pistol. Compatible with other Gen3 magazine release and slide stop components. **NOTE:** The universal rail is not the same as a 1913 Picatinny rail; different attachment components may be necessary.

Attributes

- Name: [MAGPUL EHG RG9 GRIP FRAME FOR RUGER RXM SUB-COMPACT ODG](#)

Consumer Safety Instruction Guide for Magpul EHG RG9 Grip Frame for Ruger RXM SubCompact

Introduction

Thank you for choosing the Magpul EHG RG9 Grip Frame for your Ruger RXM SubCompact. This guide provides essential safety instructions, usage precautions, and installation guidelines to ensure safe and effective use of the product. Please read this guide carefully before use.

General Safety Guidelines

- **Product Safety:** Ensure safe use of the grip frame by following all instructions. Use only with the Ruger RXM Pistol.
- **Enhanced Recalls:** Be aware that if any safety issues arise, recall notices will be provided through official channels.
- **Online Shopping:** If purchased online, ensure the retailer complies with safety regulations.
- **Special Consumer Focus:** This product is not intended for use by children. Keep out of reach of minors.
- **EU Contact Point:** For safety inquiries, contact your local EU safety authority.
- **Rapid Alerts:** Stay informed about product safety updates through the EU Safety Gate platform.

Specific Safety Precautions for Use

- **Compatibility:** Only use the EHG RG9 Grip with the Ruger RXM Pistol. It is not compatible with other models.
- **Installation:** Ensure the grip is installed correctly to avoid any malfunction during use.
- **Check for Damage:** Before use, inspect the grip for any signs of damage or wear. Do not use if damaged.
- **Proper Handling:** Always handle the firearm with care and ensure it is unloaded before installation or maintenance of the grip.
- **Secure Fit:** Ensure that the grip is securely attached to the firearm to prevent accidental detachment during use.

Instructions for Installation and Usage

1. Installation:

- Ensure the firearm is unloaded.
- Remove the factory grip from the Ruger RXM Pistol.
- Align the Magpul EHG RG9 Grip with the firearm's frame.
- Securely attach the grip by following the manufacturer's instructions included with the product.
- Confirm that the grip is firmly in place and does not move.

2. Usage:

- Familiarize yourself with the grip and its features before use.
- Use the grip to improve handling and control of the Ruger RXM Pistol.
- Utilize the magazine release scallop for efficient magazine changes.
- Ensure that the grip is clean and free of debris to maintain optimal functionality.

Disposal Instructions

- Dispose of the product in accordance with local regulations.
- Do not dispose of the grip in general waste.

- Consider recycling options if available in your area.

Contact Information for Further Support

For any questions or concerns regarding the Magpul EHG RG9 Grip Frame, please refer to your local retailer or the EU safety authority for assistance.

Thank you for prioritizing safety while using the Magpul EHG RG9 Grip Frame. Enjoy your enhanced shooting experience!
