

SWITCHBACK DF FLASHLIGHT RING WITH POCKET CLIP - SWITCHBACK DF FLASHLIGHT RING W/POCKET CLIP URBAN GRAY

SWITCHBACK DF FLASHLIGHT RING WITH POCKET CLIP The SwitchBack® DF adds a multi-function finger ring and robust pocket clip to SureFire's Dual Fuel Series Flashlights. It mounts securely on the light's tailcap, providing a repeatable grip index during deployment from pocket or pouch, and enhances ergonomics while shooting or searching. Featuring the same enhanced features as the SwitchBack® 2.0, the SwitchBack DF Flashlight Ring is the ergonomic upgrade your SureFire Dual Fuel tactical flashlight deserves! It features a larger opening to accept the Dual Fuel's tailcap and includes an additional lock to ensure it stays in place during hard use. **FEATURES:** Like all our SwitchBacks, it can be used with handguns or long guns, allowing the user to: Reliably deploy and index a flashlight from both pockets and pouches, using the SwitchBack's rigid, but releasable, retention ring. Shoot using a natural two-handed grip (the SwitchBack Technique). Employ all traditional low-light techniques such as Neck Index, Modified FBI, and Harries. Positively retain the light when drawing a firearm, reloading, and addressing a malfunction. The SwitchBack DF Flashlight Ring also provides fast deployment and enhanced retention during many activities such as climbing, backpacking, car and home maintenance, and self-defense. A finger ring that releases under heavy force/torque, but can be reset. A strong pocket clip that also works with MOLLE/PALS webbing. A pocket clip position that allows for slightly deeper carry than the SwitchBack® Large (original). A tubular portion that is cut lower to allow grip on both sides of the tail-cap during installation. A wide thumb rest with traction features. Small crush ribs on the SwitchBack DF's lip create a custom fit. Designed and manufactured in the USA. **Installation** For installation: Unlock the release ring and hold it below the latch on the tube of the SwitchBack; this will deflect the upper locking finger of the tube's channel. Insert the tailcap until it's seated at the bottom of the SwitchBack DF's tube. Reattach the ring to the latch on the tube: This will capture the tailcap within the SwitchBack DF; you can press the top end of it against the tailcap to help seat it. No additional washers or O-rings are needed for installation, but the SureFire O-ring should stay on the light. **Note:** You do not need to remove the tailcap from the SwitchBack during battery changes. **Caution:** When changing batteries, be sure to carefully align the tailcap and body of the flashlight and screw down the tailcap without dislodging the sealing O-ring on the body of the flashlight.

Instructions for Installation and Usage

1. Installation:

- Unlock the release ring and hold it below the latch on the tube of the SwitchBack.
- Insert the tailcap until it is seated at the bottom of the SwitchBack DF's tube.
- Reattach the ring to the latch on the tube to capture the tailcap within the SwitchBack DF.
- Press the top end of the ring against the tailcap to help seat it in place.
- No additional washers or O-rings are needed for installation, but ensure the SureFire O-ring stays on the light.

2. Usage:

- Use the SwitchBack DF Flashlight Ring to reliably deploy and index your flashlight from pockets or pouches.
- Utilize a natural two-handed grip for better control while shooting or searching.
- Employ traditional lowlight techniques such as Neck Index, Modified FBI, and Harries for effective use.
- Ensure positive retention of the flashlight when drawing a firearm, reloading, or addressing a malfunction.

- The finger ring will release under heavy force or torque but can be reset for continued use.
