

RIFLE PRECISION MICROMETER BULLET SEATING DIES - LEE PRECISION 7.62X39MM RIFLE PRECISION MICROMETER BULLET SEATING DIE

LEE PRECISION RIFLE PRECISION MICROMETER BULLET SEATING DIES

Introducing the new Precision Micrometer bullet seating die. Features dead length bullet seating with smooth, accurate adjustment. Tests prove sliding bullet guide provides cartridges with the least bullet runout. When used as a dead length bullet seating die, the body contacts the shell holder assuring precise uniform seating depth. FEATURES Laser engraved micrometer thimble and body is easy to read with divisions representing one thousandth of an inch, reads just like a precision depth micrometer. Infinitely adjustable, providing precision bullet seating depth. Bullet seating stem is machined and burnished to seat nearly any point style bullet without damage or marking. The case mouth and bullet are held in perfect alignment by a floating bullet guide. The bullet guide is provided with radial clearance to allow the case and bullet guide to align perfectly with the bullet seater screw. The floating bullet guide is reversible, simply unthread guide and re-install to allow seating and crimping simultaneously, an exclusive feature to Lee. This bullet seating die proves accuracy doesn't have to cost a lot.

Safety Instruction Guide for RIFLE PRECISION MICROMETER BULLET SEATING DIES

Introduction

Thank you for choosing the RIFLE PRECISION MICROMETER BULLET SEATING DIES by LEE PRECISION. This guide is designed to ensure your safety while using this product and to provide important information regarding its proper use and maintenance. Please read this guide carefully before using the product.

General Safety Guidelines

- Ensure that the product is used in accordance with the manufacturer's instructions.
- Always wear appropriate safety gear, including eye protection, when handling and using this product.
- Keep the product out of reach of children and unauthorized users.
- Regularly inspect the product for any signs of wear or damage before each use.
- Store the product in a dry, secure location when not in use.
- Report any unsafe products or incidents to the relevant authorities.

Specific Safety Precautions for Use

- Do not exceed the maximum recommended load for the bullet seating die.
- Ensure that the bullet seating stem is properly adjusted before use to avoid misalignment.
- Always check that the floating bullet guide is securely attached before use.
- Avoid using the die if it shows signs of damage, such as cracks or deformation.
- Do not attempt to modify the product in any way, as this may compromise safety.

Instructions for Installation and Usage

1. Installation:

- Ensure that your reloading press is securely mounted.
- Remove any existing dies from the press.
- Install the bullet seating die by screwing it into the press until it is snug but not overly tight.
- Adjust the die to the desired seating depth by using the micrometer thimble.

2. Usage:

- Place a cartridge case into the shell holder of the press.
- Insert a bullet into the case mouth, ensuring it is aligned with the floating bullet guide.
- Pull the handle of the press to seat the bullet. Monitor the adjustment of the micrometer thimble for precise depth.
- After seating, check the bullet for proper alignment and depth before proceeding to crimping, if necessary.

Disposal Instructions

- Dispose of the product in accordance with local regulations regarding metal and plastic waste.
- Do not dispose of the product in regular household waste.
- If the product is damaged or no longer usable, consider recycling materials where possible.

Contact Information for Further Support
