LEE PRECISION RIFLE PRECISION MICROMETER BULLET SEATING DIES

Introducing the new Precision Micrometer bullet seating die. Features dead length bullet seating with smooth, accurate adjustment. Tests prove sliding bullet guide provides cartridges with the least bullet runout. When used as a dead length bullet seating die, the body contacts the shell holder assuring precise uniform seating depth. FEATURES Laser engraved micrometer thimble and body is easy to read with divisions representing one thousandth of an inch, reads just like a precision depth micrometer. Infinitely adjustable, providing precision bullet seating depth. Bullet seating stem is machined and burnished to seat nearly any point style bullet without damage or marking. The case mouth and bullet are held in perfect alignment by a floating bullet guide. The bullet guide is provided with radial clearance to allow the case and bullet guide to align perfectly with the bullet seater screw. The floating bullet guide is reversible, simply unthread guide and re-install to allow seating and crimping simultaneously, an exclusive feature to Lee. This bullet seating die proves accuracy doesn't have to cost a lot.

Safety Instruction Guide for RIFLE PRECISION MICROMETER BULLET SEATING DIES

Introduction

Thank you for choosing the RIFLE PRECISION MICROMETER BULLET SEATING DIES by LEE PRECISION. This guide provides essential safety information and instructions to ensure the safe and effective use of this product. Please read this guide carefully before using the product.

General Safety Guidelines

- Always handle the bullet seating die with care to avoid injury.
- Use the product only for its intended purpose: seating bullets in reloading applications.
- Ensure that the workspace is clean and free of obstructions to prevent accidents.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly inspect the die for wear and damage before use.
- If you notice any defects or irregularities, discontinue use immediately and consult a professional.

Specific Safety Precautions for Use

- Always wear appropriate safety gear, including eye protection, when using this product.
- Avoid wearing loose clothing or jewelry that could get caught in the equipment.
- Ensure that the bullet guide is properly aligned before seating bullets to avoid misfires or damage.
- Do not exceed the recommended bullet seating depth to prevent excessive pressure buildup.
- Store the bullet seating die in a safe, dry place when not in use.

Instructions for Installation and Usage

1. Installation:

- Ensure that your reloading press is securely mounted and stable.
- Attach the bullet seating die to the reloading press according to the manufacturer's instructions.
- Adjust the die height to ensure proper alignment with the shell holder.

2. Usage:

- Place the cartridge case into the shell holder of the reloading press.
- Adjust the micrometer thimble to the desired bullet seating depth.
- Insert the bullet into the case mouth, ensuring it is properly aligned.
- Activate the reloading press to seat the bullet. Monitor the process to ensure smooth operation.
- After seating, check the cartridge for proper bullet depth and alignment.

Disposal Instructions

- Dispose of any damaged or worn components of the bullet seating die in accordance with local regulations.
- Do not dispose of the product in fire or water bodies.
- If you are unsure about disposal methods, consult local waste management authorities.

Contact Information for Further Support

For any inquiries regarding safety or product support, please refer to the manufacturer's contact information

provided with the product packaging.

Conclusion

Following these safety guidelines will help ensure a safe and effective reloading experience with your RIFLE PRECISION MICROMETER BULLET SEATING DIES. Always prioritize safety and consult professionals if you have any questions or concerns. Thank you for your attention to these important instructions.
