LEE PRECISION RIFLE PRECISION MICROMETER BULLET SEATING DIES

Introducing the new Precision Micrometer bullet seating die. Features dead length bullet seating with smooth, accurate adjustment. Tests prove sliding bullet guide provides cartridges with the least bullet runout. When used as a dead length bullet seating die, the body contacts the shell holder assuring precise uniform seating depth. FEATURES Laser engraved micrometer thimble and body is easy to read with divisions representing one thousandth of an inch, reads just like a precision depth micrometer. Infinitely adjustable, providing precision bullet seating depth. Bullet seating stem is machined and burnished to seat nearly any point style bullet without damage or marking. The case mouth and bullet are held in perfect alignment by a floating bullet guide. The bullet guide is provided with radial clearance to allow the case and bullet guide to align perfectly with the bullet seater screw. The floating bullet guide is reversible, simply unthread guide and re-install to allow seating and crimping simultaneously, an exclusive feature to Lee. This bullet seating die proves accuracy doesn't have to cost a lot.

Safety Instruction Guide for LEE Precision Rifle Precision Micrometer Bullet Seating Die

Introduction

Thank you for choosing the LEE Precision Rifle Precision Micrometer Bullet Seating Die. This guide provides important safety information and instructions for the safe use of this product. Please read this guide carefully to ensure proper handling and operation.

General Safety Guidelines

- Always follow the manufacturer's instructions for use.
- Ensure that the die is used in a wellventilated area to avoid inhalation of any potentially harmful substances.
- Keep the product out of reach of children and unauthorized users.
- Inspect the die before each use for any signs of damage or wear. Do not use if damaged.
- Use the die only for its intended purpose as specified in this guide.
- Store the die in a dry and secure location when not in use.

Specific Safety Precautions for Use

- Ensure that the firearm is unloaded before using the bullet seating die.
- Always wear appropriate safety gear, including safety glasses, when operating the die.
- Avoid wearing loose clothing or jewelry that may get caught in the equipment.
- Do not exceed the recommended bullet seating depth as specified in the product specifications.
- Be cautious of the sharp edges and points on the die to prevent cuts or injuries.
- Use only compatible cartridges as specified in the product description (e.g., 338 Lapua).

Instructions for Installation and Usage

1. Installation

- Securely mount the die in a reloading press according to the manufacturer's instructions.
- Ensure that the die is tightened properly to avoid movement during use.

2. Usage

- Adjust the micrometer thimble to the desired bullet seating depth, ensuring it is set to the correct measurement.
- Place the cartridge case in the shell holder and align it with the die.
- Insert the bullet into the case mouth, ensuring it is aligned properly.
- Lower the ram of the reloading press to seat the bullet. Monitor the adjustment to achieve the desired bullet depth.
- After seating, inspect the cartridge for proper alignment and depth.

Disposal Instructions

- Dispose of any unused or damaged components in accordance with local regulations.
- Do not dispose of the die in household waste. Contact your local waste management facility for proper disposal methods.

Contact Information for Further Support

For any safety inquiries or concerns regarding this product, please reach out to your local LEE Precision representative or visit the official LEE Precision website for additional resources.

Conclusion

By following these safety guidelines and instructions, you can ensure a safe and effective experience with your LEE Precision Rifle Precision Micrometer Bullet Seating Die. Always prioritize safety and proper handling to enjoy the best performance from your reloading equipment.
