LEE PRECISION RIFLE PRECISION MICROMETER BULLET SEATING DIES

Introducing the new Precision Micrometer bullet seating die. Features dead length bullet seating with smooth, accurate adjustment. Tests prove sliding bullet guide provides cartridges with the least bullet runout. When used as a dead length bullet seating die, the body contacts the shell holder assuring precise uniform seating depth. FEATURES Laser engraved micrometer thimble and body is easy to read with divisions representing one thousandth of an inch, reads just like a precision depth micrometer. Infinitely adjustable, providing precision bullet seating depth. Bullet seating stem is machined and burnished to seat nearly any point style bullet without damage or marking. The case mouth and bullet are held in perfect alignment by a floating bullet guide. The bullet guide is provided with radial clearance to allow the case and bullet guide to align perfectly with the bullet seater screw. The floating bullet guide is reversible, simply unthread guide and re-install to allow seating and crimping simultaneously, an exclusive feature to Lee. This bullet seating die proves accuracy doesn't have to cost a lot.

Safety Instruction Guide for LEE Precision Rifle Precision Micrometer Bullet Seating Die

Introduction

Thank you for choosing the LEE Precision Rifle Precision Micrometer Bullet Seating Die. This guide provides essential safety instructions and information to ensure safe and effective use of the product. Please read the entire guide carefully before using the die.

General Safety Guidelines

- Always handle the bullet seating die with care to avoid injury.
- Ensure you are using the die with compatible cartridges only.
- Keep the die and all reloading components out of reach of children and unauthorized users.
- Always wear appropriate safety gear, including safety glasses and gloves, while reloading ammunition.
- Regularly inspect the die for any signs of wear or damage before use.
- Follow all local laws and regulations regarding ammunition reloading.

Specific Safety Precautions for Use

- Ensure the work area is clean and free from distractions when reloading.
- Do not use the bullet seating die if you are tired or under the influence of substances that may impair your judgment.
- Always doublecheck your measurements and settings before seating bullets.
- Use only the recommended bullet styles compatible with this die to prevent jams or misfires.
- Never exceed the recommended load data for your cartridges.

Instructions for Installation and Usage

1. Installation:

- Securely mount the bullet seating die into your reloading press according to the manufacturer's instructions.
- Make sure the die is tightened properly to prevent movement during operation.

2. Usage:

- Prepare your cartridge cases by cleaning and resizing them as necessary.
- Insert the case into the shell holder of your reloading press.
- Adjust the micrometer thimble to the desired bullet seating depth. Ensure the reading is clear and accurate.
- Place the bullet in the case mouth and gently raise the ram to seat the bullet.
- Check the seating depth after each adjustment to maintain consistency.

3. PostUse:

- After use, clean the die to remove any residue or debris.
- Store the die in a safe, dry place, away from moisture and extreme temperatures.

Disposal Instructions

- Dispose of any damaged or worn components in accordance with local regulations.
- Do not throw the die or any reloading materials in regular household waste.

- Contact your local waste management authority for guidance on proper disposal methods for reloading components.

Contact Information for Further Support

For further inquiries regarding safety or product usage, please refer to the LEE Precision website or contact your local distributor. Ensure you have the product details ready for efficient assistance.

By following these guidelines, you will help ensure a safe and effective reloading experience with your LEE Precision Rifle Precision Micrometer Bullet Seating Die. Thank you for prioritizing safety!
