

Ultrasonic Case Cleaner

[Reloading](#) > [Case Cleaning](#) > [Ultrasonic Case Cleaners](#)

The Prussia Precision Ultrasonic Case Cleaner is a heated 2-liter ultrasonic cleaning unit designed for reloaders and firearm enthusiasts who demand deep, consistent cleaning results. Engineered to remove carbon residue, fouling, grease, and deposits from cartridge cases and metal components, it delivers thorough cleaning performance inside and out.

Using high-frequency ultrasonic waves, the cleaner reaches areas that traditional tumbling or manual cleaning cannot - including primer pockets, flash holes, and internal case walls. When used with a suitable ultrasonic cleaning solution, combustion residues and stubborn deposits are loosened efficiently without abrasive media.

The integrated 80-watt ceramic heating element enhances the cleaning process by warming the cleaning solution to approximately 57°C, accelerating residue breakdown and improving overall effectiveness. The heater can be activated as needed to match the cleaning task.

An adjustable timer allows cleaning cycles between 5 and 30 minutes, giving users full control depending on the level of contamination and the components being cleaned. After extended operation, the unit should be allowed to cool briefly before starting the next cycle.

The 2-liter stainless steel tank provides practical capacity for reloading batches, holding approximately 300 cases in .223 Remington or 150 cases in .308 Winchester. In addition to brass, the cleaner is suitable for bolts, muzzle devices, small firearm components, and other metal parts that fit within the cleaning basket. Designed for reliability, efficiency, and workshop use, the Prussia Precision Ultrasonic Case Cleaner delivers professional-level results in a compact and easy-to-operate format.

Ultrasonic Case Cleaner Safety Instruction Guide

Introduction

Thank you for choosing the Prussia Precision Ultrasonic Case Cleaner. This guide provides essential safety instructions to ensure safe and effective use of the product. Please read and follow these instructions carefully to avoid hazards and ensure optimal performance.

General Safety Guidelines

- Always use the product as intended and in accordance with the instructions provided.
- Keep the ultrasonic case cleaner out of reach of children and vulnerable individuals.
- Inspect the unit and its components regularly for any signs of damage or wear. Do not use if damaged.
- Avoid using the cleaner in wet or damp environments to prevent electrical hazards.
- Ensure proper ventilation when using the cleaner to avoid inhaling any fumes from cleaning solutions.
- Always unplug the unit when not in use or when cleaning the tank.

Specific Safety Precautions for Use

- Use only recommended ultrasonic cleaning solutions. Follow the manufacturer's instructions for dilution and usage.
- Do not exceed the maximum capacity of the cleaning tank to ensure effective cleaning and prevent spillage.
- Avoid placing any items in the cleaner that are not suitable for ultrasonic cleaning, such as soft plastics or items that may be damaged by heat or water.
- Be cautious when handling hot cleaning solutions. Allow the unit to cool before attempting to touch the tank or contents.
- Do not operate the cleaner without water or cleaning solution in the tank, as this may damage the unit.
- Use personal protective equipment (PPE) such as gloves and goggles when handling cleaning solutions.

Instructions for Installation and Usage

1. **Placement:** Place the ultrasonic case cleaner on a stable, flat surface away from water sources and direct sunlight.
2. **Filling the Tank:**
 - Open the lid and fill the stainless steel tank with water or the appropriate cleaning solution up to the recommended level.
 - Ensure that the tank is not overfilled to prevent spillage during operation.
3. **Connecting Power:**
 - Plug the cleaner into a suitable electrical outlet.
 - Ensure that the power cord is not damaged and is positioned to avoid tripping hazards.
4. **Setting the Heater:**
 - If desired, activate the heater to warm the cleaning solution to approximately 57°C for enhanced cleaning effectiveness.
5. **Adjusting the Timer:**
 - Set the timer for the desired cleaning cycle between 5 and 30 minutes, based on the level of contamination.
6. **Starting the Cleaner:**
 - Press the start button to begin the cleaning process. Monitor the unit during operation.
7. **Completion:**
 - Once the cleaning cycle is complete, allow the unit to cool briefly before opening the lid.
 - Carefully remove the cleaned items using appropriate tools to avoid burns or injury.
8. **Cleaning the Unit:**
 - After use, unplug the unit and allow it to cool completely before cleaning the tank and exterior.

surfaces.

Disposal Instructions

- Dispose of any used cleaning solutions according to local regulations and guidelines.
- Recycle the packaging materials where possible.
- If the ultrasonic case cleaner reaches the end of its life, dispose of the unit in accordance with local electronic waste disposal regulations.

Contact Information for Further Support

For any questions or concerns regarding the Prussia Precision Ultrasonic Case Cleaner, please refer to the product packaging or visit the manufacturer's website for additional support and resources.

By following these safety instructions, you can ensure a safe and effective cleaning experience with your Prussia Precision Ultrasonic Case Cleaner. Thank you for your attention to these important guidelines.
