

ACE Trigger System for Glock - Legacy Special Glock Trigger

While very similar to the "Certified" model, the Legacy series is designed for shooters who prefer the traditional Glock-style safety interface or have specific ergonomic needs.

TriggerTech Glock Legacy Special – The Classic Feel, Reimagined The TriggerTech Legacy Special combines the legendary performance of TriggerTech's rifle triggers with the familiar ergonomics of the classic Glock interface. While the "Certified" model features a monolithic safety pad, the Legacy version utilizes a traditional lever-style safety (safety blade) in the center of the trigger shoe, making it the ideal choice for shooters who want a high-performance upgrade that retains the tactile feel of a duty-style trigger.

Zero Creep Technology™: Eliminates all take-up "mush" and grittiness. You get a crisp, glass-like break that is consistently repeatable, significantly improving accuracy.

Refined Ergonomics: The Legacy trigger shoe is positioned slightly further back than the Certified model. This makes it an excellent option for shooters with smaller hands or those who prefer a shorter reach to the trigger.

Traditional Lever Safety: Features a modernized version of the classic Glock safety blade. It is designed to be smoother and more reliable, ensuring the safety is fully disengaged even with off-center finger placement.

CLKR Technology™: Fully adjustable pull weight from 2.5 lbs to 6.0 lbs. Whether you are setting up a dedicated competition gun or a crisp defensive pistol, you can dial in the weight in tactile, clicking increments.

Two-Stage Action: Provides a clear, smooth take-up followed by a solid "wall" and a sharp break, giving you total control over the shot timing.
